COURSE DESCRIPTION

The PuzzleArt™ Therapy Functional Visual Skills Training Program is a six-credit hour, full day hands-on training course with an overview of the visual, thinking, perceptual, sensory and oculomotor skills needed for success, and the PuzzleArt™ Therapy System which can help screen, develop and improve 20 of these skills.

It gives an introduction to the PuzzleArt™ Therapy System, which is the first therapy to combine binocular, perceptual, oculomotor and PuzzleArt™ sensory protocols using hands-on abstract art.

Therapists train on, and leave with PuzzleArt™ Therapy concepts, tools including our Functional Visual Skills Screening, techniques and targeted materials which can be used the very next day with their client/patient/student populations in an innovative, colorful and fun way. Use our program throughout the lifespan – for Early Intervention through Geriatric clients. Program includes materials for younger and low functioning children.

The PuzzleArt™ Therapy System is used in private and military hospitals, clinics, universities, schools, therapy offices, and rehabilitation centers throughout the US and in 16 other countries for • ADD / ADHD • Brain Fitness • Developmental Delay • Fine Motor • Gross Motor • Motor Planning • Visualization • Oculomotor • Organization and more for a variety of therapy modalities such as Occupational Therapy • Physical Therapy • Sports Therapy • Strabismus Therapy • Traumatic Brain Injury • Vision Therapy and more.

Each participant will receive:

[A PuzzleArt Kit – A \\$425.00 VALUE!!!! Use the very next day in your daily practice!](#)

COURSE OBJECTIVES

Participants completing this course should be able to:

- Define visual perception, visual motor, oculomotor, binocular and sensory skills
- Identify the type of intervention activities that will help develop and improve visual skills
- Conduct a quick Functional Visual Skills Screening to be used in conjunction with clinical assessment and standardized tests as well as three eye-hand movements which can be used to help improve visual skills
- Explain the relationship of visual skills to reading, writing and daily life skills
- Integrate therapeutic skills and practice them using a minimum of six targeted fine motor and visual system skills
- Apply this new form of integrative therapy to current practice
